

Trezzano s/n, January 2018

### Nuova ASP Srl

Nuova ASP designs and manufactures electrical security equipment for explosion-proof and watertight electrical plants mainly used in chemical, petrochemical and oil&gas industries.

Founded in 1984, the company established itself in the industrial plant security market where work is carried out in potentially hazardous and explosive areas with inflammable materials. In Italy, Nuova ASP consists of a production facility, which allows the direct control of production costs at every stage of the project and a company with a commercial vocation.

Nuova ASP's products are developed with the most advanced technologies. The company uses the most modern machinery with robotic and automated process timetabled by the most cutting-edge software. The production processes, controlled by these state of the art technologies, have ATEX notification.

The optimization and constant updating of production processes allow the company to offer the most suitable solution for each customer, from bulk production to limited and personalized series. All Nuova ASP's solutions are compliant with the most important national and international standards: ATEX, IECEX, TR CU, INMETRO, UL, KC and CCOE-PESO.

Quality is a key element in the company's processes and activities: ever since 1994, Nuova ASP acquired the CSQ certification, according to the ISO 9002 standards, and turned out to be one of the first Italian companies to earn this acknowledgement.

Later, the company also obtained the UNI EN ISO 9001:2008 certification, the ISO 14001:2004 certification for the environmental management system and OHSAS 18001:2007 certification for the Health and Safety of Workers.

Since December 2014 Nuova ASP is part of BARTEC Group.

### Vision for the future

The Nuova ASP's strategic plan is expressed in two forms:

- increase of the research and development activities for new products with high technological content;
- expansion of Nuova ASP's presence in those countries with high potential growth.

The strategic plan confirmed the intense international expansion of the last few years which led the company to open new branches especially in the Asian market. In the next few years the company will open new subsidiaries worldwide in order to satisfy the goals of customer proximity.

### Complete range of products

- Lighting and receptacle socket outlet panel boards
- Motor starters panel boards
- Control system earthing panel boards
- Marshalling, pulling and junction boxes in GRP, aluminum and stainless steel
- Instruments housings
- Ex ed control stations in GRP, aluminum and stainless steel enclosures
- Circuit breakers, on-load switch and selector switches
- Receptacle socket outlets in resin or aluminum with junction box

- Incandescent, fluorescent, led and discharge lamps lighting fixtures
- Emergency lighting fixtures
- Traffic lights
- Obstruction lights
- Warning lights
- Horns, bells and sirens
- Cable glands
- Sealing fittings
- Junction and pulling boxes
- Accessories for Ex zone as reducers, adaptors, elbows, flexibles etc.

## Markets

- Oil&gas
- Chemical and pharmaceutical industry
- Energy
- Utilities
- Food industry
- Logistics and airport terminals
- Mining
- Nuclear
- water treatment
- Wood industry

**Registered Office:** Trezzano sul Naviglio (Milano): via Mario Pagano 7/9 – 20090 Trezzano sul Naviglio (MI)

**1 production unit in Italy:** Moraro (Gorizia): via Giosuè Carducci, 16 – 34070 Moraro (GO)

**Revenues 2017:** 20.000.000 Euro
